

PROFLOSS® WATERFLOSSER

ProFloss® Waterflosser is the first faucet powered oral irrigator under \$20.

Great for anyone with braces. Now you can thoroughly clean your mouth without stopping to refill a reservoir or change waterfloss picks.

ProFloss® Waterflosser will help freshen breath and give you a healthy smile by removing debris and bacteria left behind by brushing and flossing... while massaging your gums.

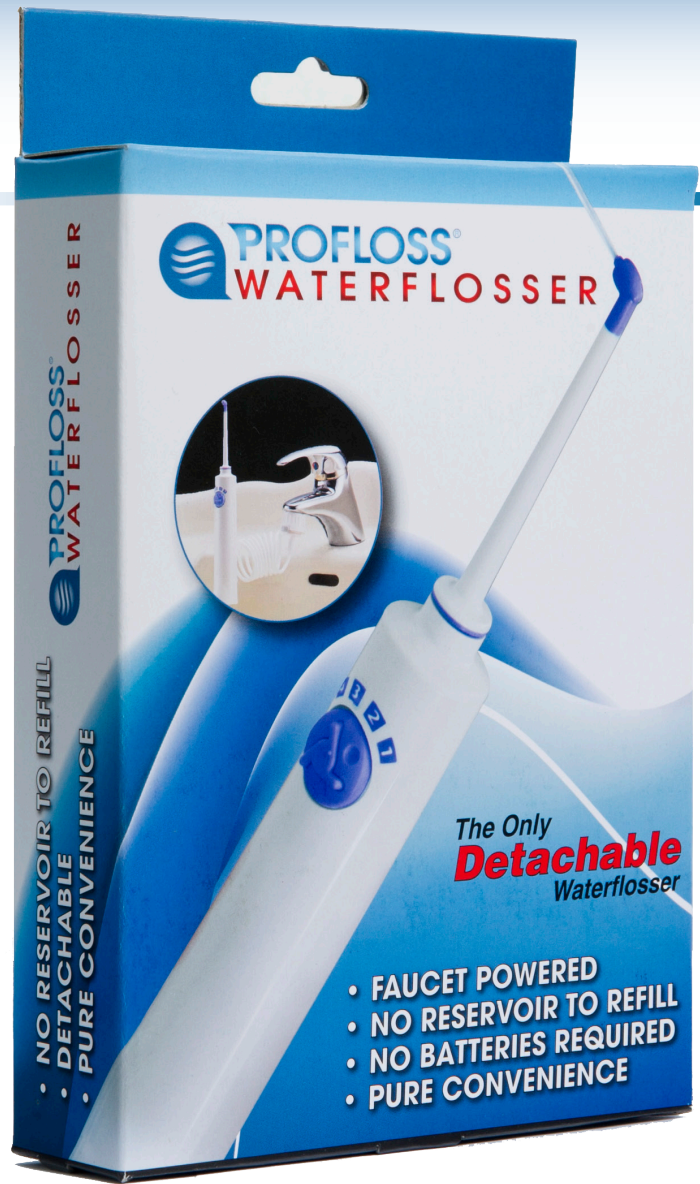

AFFORDABLE & perfect for the entire family!

ProFloss® Waterflosser takes up no countertop space because you attach it to your faucet in seconds - only when needed. It's **powered by your faucet, not electricity**, which means no noisy motor. There's **no reservoir to refill** and **no battery to recharge**, so you're ready to use anytime by simply turning on the water. **PURE CONVENIENCE!**
